1. Quick Installation

- Before opening the sensor. Please ensure that you are wearing gloves, or your hands are fully dry.
 - 1- Open the sensor by rotating the cap anti-clockwise.
- Look at the vertical board as shown in the picture below.
 - 2- Switch the sensor ON by moving the switch in the ON position.
 - 3- Once the switch is on a Red LED (A-board) will start flashing. It might take 1 to 2 minutes till the green-colored LED starts blinking on the sensor to indicate a successful connection to the internet.
During the network connecting the Blue LED (B-board) will blink
 - 4- The sensor now can be closed and please make sure the enclosure is tight enough so no moisture or dirt can go inside.
